

Modernize Your Data Estate for Agentic AI Success

Auto-transform siloed, legacy data assets into a trusted knowledge base that makes agentic AI work

Up to 95% automation

4x faster transformation

50% time & cost savings

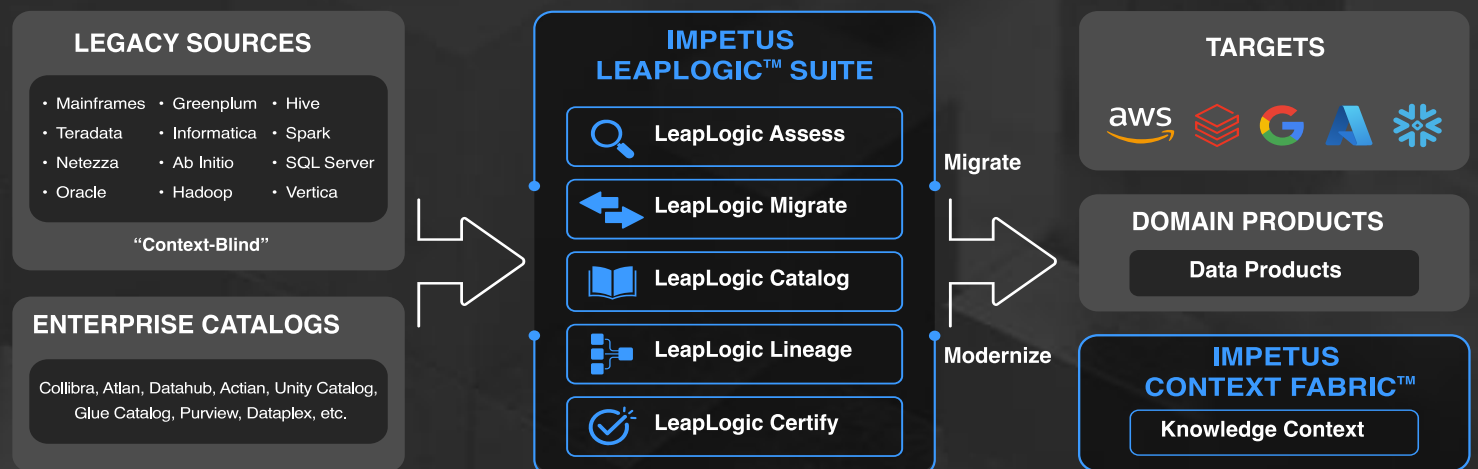

100% business logic preservation

100% risk compliance

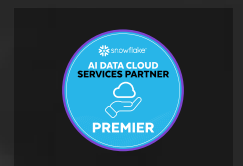

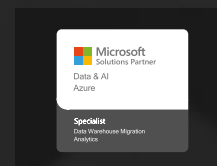

100% SLA adherence

Legacy data platforms were built for dashboards, not AI agents. Impetus LeapLogic™ Suite automates the full migration of your data infrastructure — schemas, pipelines, lineage, quality, entitlements — from any legacy source to any modern cloud platform. While your competitors are still planning migrations, you'll be shipping AI.

The Industry's Only Modernization Solution that Builds Context, Not Pipelines

We Partner with the Best to Deliver the Best

Five Components. One Automated Modernization Suite.

LeapLogic Assess

Scan, profile, and inventory your entire legacy environment (SQL, ETL, schema, lineage, and more) in days; and get an AI-readiness blueprint.

LeapLogic Migrate

Convert and migrate ETL scripts, schemas, and pipelines with >95% automation – from any legacy source to any cloud target.

LeapLogic Catalog

Enrich complex metadata with a unified semantic foundation, so that AI and humans can truly understand and act on it.

LeapLogic Lineage

Map logic, meaning, and dependencies across enterprise data products, enabling explainability, impact analysis & confident change.

LeapLogic Certify

Auto-validate migrated data for completeness, accuracy, freshness, and AI-readiness before go-live — no manual QA bottlenecks.
