IMPETUS

AI Implementation Readiness Assessment (AIRA)

Close the context, talent, and process gaps that stand between AI ambition and real-world success

Promising AI pilots often hit roadblocks on the path to production. Gaps in data, semantics, governance, operations, cost visibility, and organizational preparedness quickly become barriers to scale. Impetus' AI Implementation Readiness Assessment (AIRA) acts as an evidence-backed leadership toolkit that helps enterprises prioritize what matters, architect what's needed, and activate AI at scale.

Uncover critical AI readiness gaps

Context Gaps

Identifies data, semantic, execution, and governance gaps—along with cost visibility blind spots.

Talent Gaps

Assesses AI preparedness across enterprise teams, GenAI & agentic AI skill adoption, and governance maturity.

Process Gaps

Evaluates AI development lifecycle practices, AIOps maturity, human-in-the-loop processes, and operational discipline.

What AIRA delivers

Executive readiness view

An enterprise AI readiness score, maturity level benchmark, and readiness band, along with a detailed assessment report.

Transformation roadmap

A sequenced path encompassing quick wins, medium-term priorities, strategic initiatives, and long-term actions.

Prescriptive recommendations

Recommendations on exactly what needs to be fixed, modernized, governed, and scaled across the data & AI estate.

Tailored diagnostics

Assessment insights contextualized to AI use cases, target platforms, and the current enterprise landscape.

Engineering-led validation

Impetus' Forward Deployed Builders collaboratively validate technical architecture, data priorities, and implementation needs.

Evidence-backed audit trail

Full traceability of assessment findings to supporting evidence for greater transparency, accountability, and confidence.

Move from assessment to action with an advanced AI-readiness workbench

Explore assessment findings in natural language, backed by rule-based verdicts and supporting evidence, with built-in controls for governance and cost control.

Resolve context gaps	Verify AI answers	Prepare next steps
Expose conflicting meanings and trace downstream impact.	Audit conversational analytics answers against governed business metrics.	Review fix bundles and compare readiness before and after.

Why AIRA?

Reduced hallucination risk
Prioritize and productionize the right AI use cases on a mature foundation

Defensible scoring
Move beyond subjective evaluations with evidence-backed scoring

Unparalleled depth
Get granular insights with 35 evaluation points across 6 readiness areas

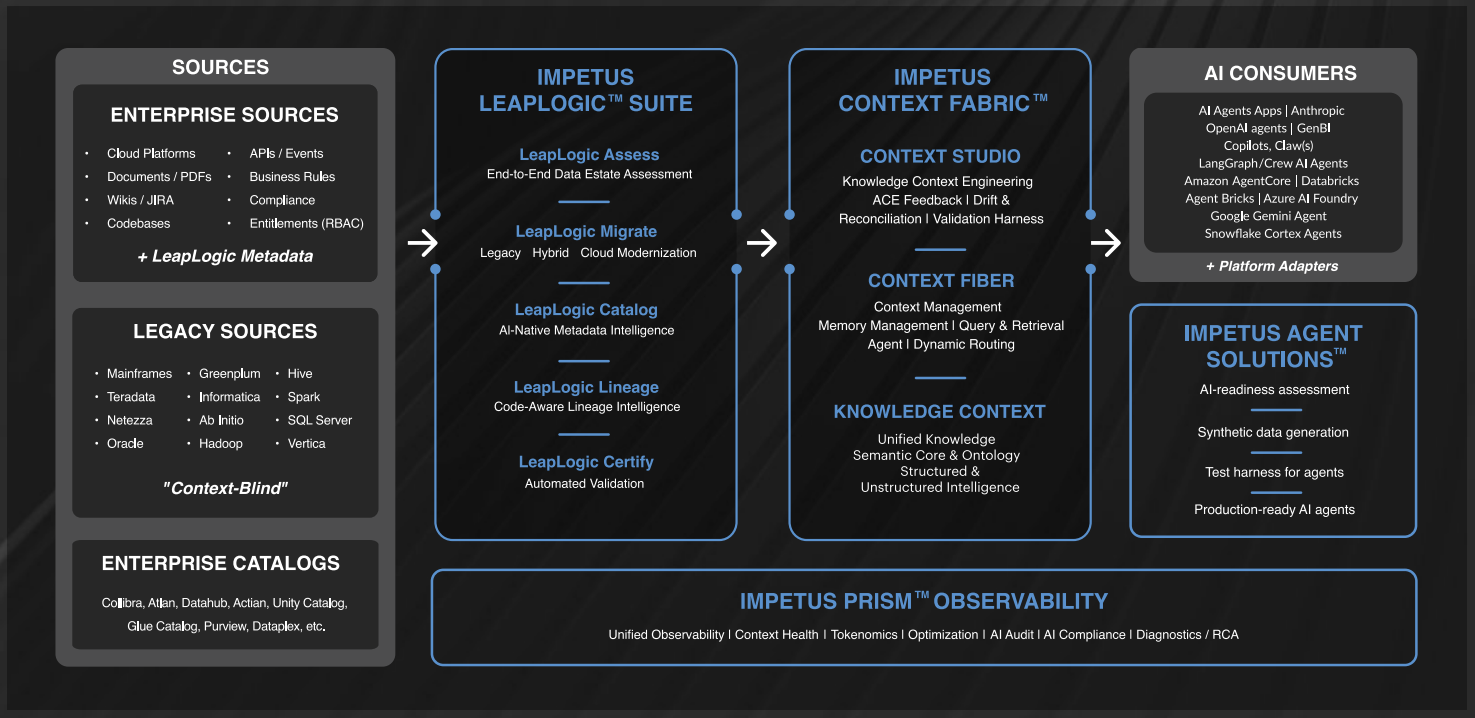

Built for action
Map recommendations to clear owners, KPIs, investment priorities & timelines

With Impetus' AI Implementation Readiness Assessment, enterprises can accelerate high-impact use cases, strengthen governance, align cross-function teams, and scale AI adoption.

Bridge the Context Gap. Make Enterprise AI Actually Work.

AI Implementation Assessment Readiness (AIRA) is part of the larger Impetus Leap™ AI Solutions & Services Family, which helps enterprises bridge the Context Gap – the disconnect between what AI models know and what makes an enterprise unique, including proprietary data and ways of working. Leap AI enables organizations to modernize data foundations, engineer enterprise context, orchestrate trusted agentic AI systems, and govern them at scale.
