IMPETUS
The Intelligent Enterprise → Delivered

IMPETUS LEAP™ AI SOLUTIONS & SERVICES FAMILY

Bridge the Context Gap. Make Enterprise AI Actually Work.

Modernize data foundations, engineer enterprise context, orchestrate trusted agentic AI systems, and govern them at scale.

Most AI pilots fail not because the model falls short — but because the data surrounding it is fragmented, stale, or structurally incompatible with AI. We call this the Context Gap, and it has four distinct layers, each of which must be addressed independently and in sequence.

THE DATA GAP

Your institutional knowledge is locked in legacy systems — data, warehouses, mainframes, ETL pipelines, and BI reports.

AI cannot see all your data or reason with it.

THE SEMANTIC GAP

Even where data is accessible, it lacks meaning. AI doesn't understand your business rules or compliance constraints.

AI hallucinates or gives generic output.

THE EXECUTION GAP

AI agents struggle to execute reliably due to context drift across handoffs, poor observability, and orchestration loopholes.

Pilots work in demos, but stall in production.

THE TRUST GAP

AI systems often lack enterprise-specific guardrails and governance needed to make the right decisions.

AI can create liability risks, limiting agentic scalability.

Four Seamless Solutions to Close the Context Gap

Impetus Leap™AI Solutions & Services Family has been built to close the Context Gap and enable trusted, scalable enterprise AI. These solutions along with Impetus Context Engineering Delivery Lifecycle (CEDL) methodology ensure no agent reaches production without a context bundle, evaluation record, and explainability trace.

MODERNIZE

Impetus LeapLogic™ Suite

Semantics-led modernization of any legacy or cloud source – data warehouse, ETL, analytics, BI, mainframe, apps, RPA – to AI-ready infrastructure, with up to 95% automation.

ENGINEER

Impetus Context Fabric™

Turn raw data into AI-consumable context for agents and LLMs, with a semantic intelligence layer connecting ontology, knowledge graphs, rules, policies, and lineage.

ORCHESTRATE

Impetus Agent Solutions™

Automate business and tech operations with domain-specific Skills, Kits, and Agents — evaluated, benchmarked, governed, and production-ready.

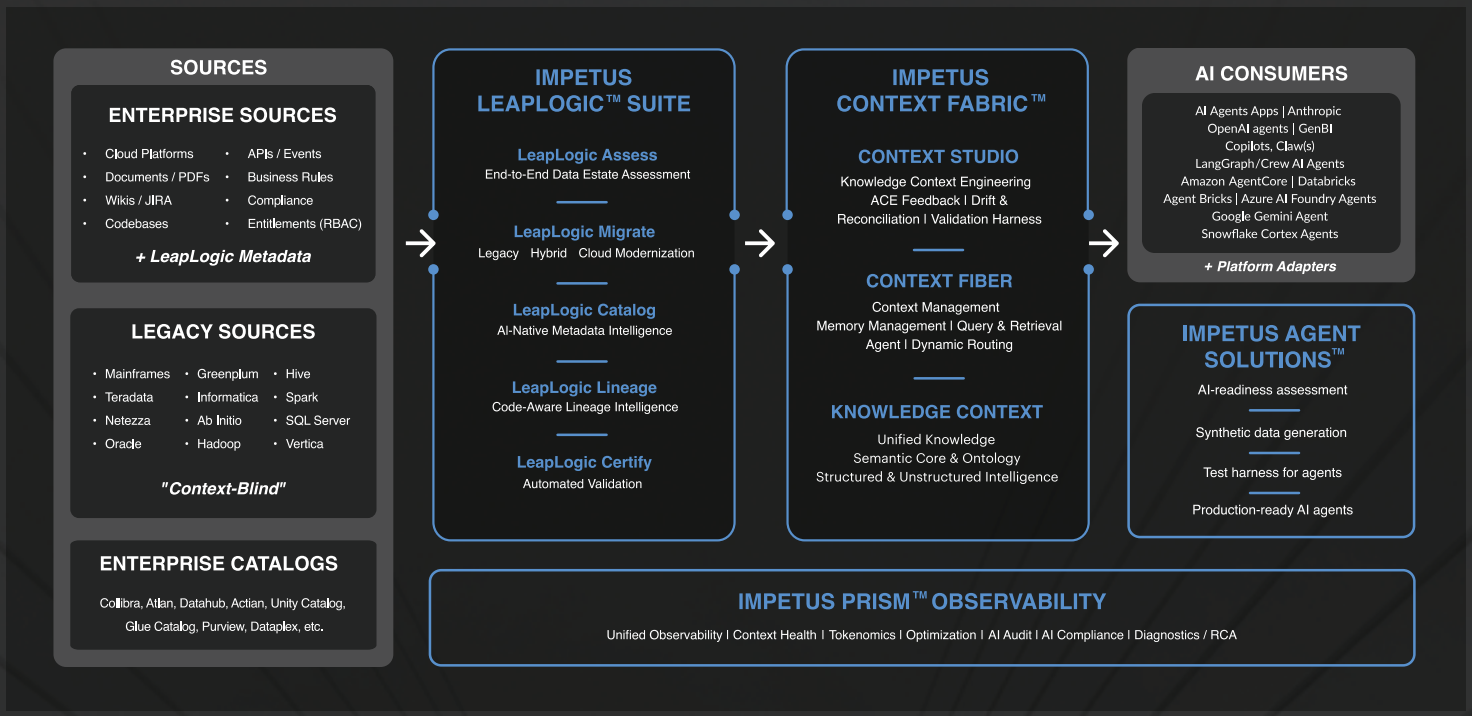

GOVERN

Impetus Prism™

An enterprise AI trust platform that unifies observability, cost intelligence, performance optimization, and governance across your entire cloud, data, and AI ecosystem.

>95% agent accuracy	**Lower hallucination risk**	**Fully context-aware agents**
4x faster migrations	**50% faster release cycles**	**50% lower operational cost**

Impetus Leap™ AI Family: Software-Led Solutions & Services That Deliver Context-Aware Agentic AI From Day One

Architect AI from Start to Finish with Impetus Forward Builders Practice

Move context-aware AI from idea to production with one accountable expert who combines product, design, and engineering expertise — spanning the disciplines and industry knowledge needed to engineer trusted AI systems that work beyond demos. Our Forward Builder pods design multi-agent workflows around how your teams actually work.

Fewer handoffs	Zero context loss	Custom, multi-model solutions

IMPETUS

Impetus Technologies is a global software-led Data and AI services company that helps enterprises make AI actually work. Built on a rich engineering heritage, deep industry expertise, and a robust technology partner ecosystem, Impetus enables organizations to modernize data foundations, engineer enterprise context, orchestrate trusted agentic AI systems, and govern them at scale to deliver measurable business outcomes. Impetus partners with leading organizations across financial services, consumer packaged goods, healthcare, life sciences, manufacturing, travel and hospitality, and other industries, worldwide.
