IMPETUS

leaplogic™ Suite

LEAPLOGIC CERTIFY

Validate transformed workloads for production-readiness, reliability, and scalability — before going live

Ensure a trusted semantic foundation for governed AI & advanced analytics at scale

In the journey to AI-readiness, trust is crucial. Modernization without validation introduces risk, while incomplete validation creates false confidence. LeapLogic™ Certify ensures continuous, intelligent validation of migrated systems for enterprise-grade operations.

Reimagine data estate modernization with LeapLogic™ Certify

Workload & SLA validation
Measure and certify system performance against defined benchmarks

End-to-end functional certification
Validate SQL, queries, rules, and business logic equivalence

Full-spectrum coverage
Ensure table, file, schema, row, and cell-level validation

Context-aware AI enablement
Check for semantic consistency in the target environment

Data product readiness
Always-on support for validation across newly created domain data products

AI-augmented validation
Automate data quality checks, reconciliation, and anomaly detection

Synthetic data-driven assurance
Enable safe validation and compliance even in constrained environments

Seamless integration
Use agentic AI for digital QA, RCA, etc. with a pluggable AI MCP interface

Why LeapLogic Certify?

Be production-ready from day one. Validate migrated systems and transformed data products for technical accuracy, semantic consistency, performance readiness, and business outcome alignment.

Reduce validation effort and rework	**Lower risk of defects and logic drift**	**Scale AI confidently with audit-readiness**	**Enhance performance, reliability, and scalability**

Beyond LeapLogic™ Certify: Transform legacy estates into trusted, domain-aligned, AI-ready data products with Impetus LeapLogic Suite

The longer you stay on legacy infrastructure, the further behind your AI becomes. LeapLogic Certify is part of the award-winning Impetus LeapLogic Suite, which eliminates migration uncertainties with a fully automated, validated path from where you are to where AI needs you to be.

LeapLogic Assess

Scan, profile and inventory your entire legacy environment (SQL, ETL, schema, lineage, and more) and get an actionable blueprint for risk-free migration.

LeapLogic Migrate

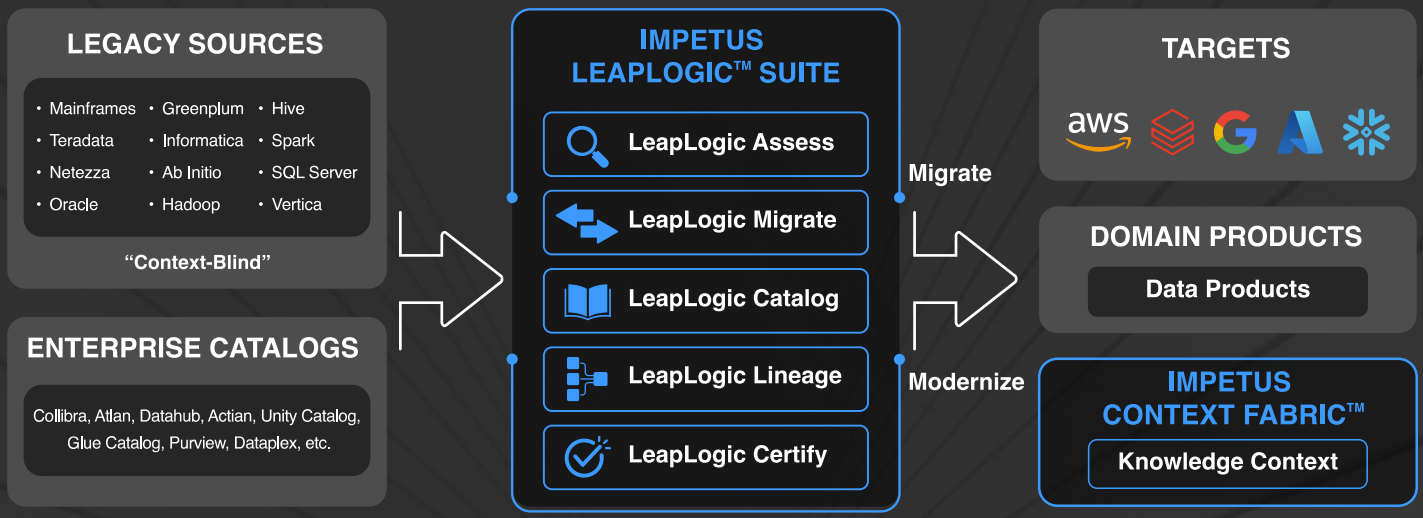

Transform data warehouses, ETL scripts, RPA systems, BI reports, applications, and more from any legacy/cloud source to any target – with up to 95% automation.

LeapLogic Catalog

Enrich complex metadata with a unified semantic foundation, so that AI and humans can truly understand and act on it.

LeapLogic Lineage

Map logic, meaning, and dependencies across enterprise data products, enabling explainability, impact analysis & confident change.

Deterministic by design. AI-augmented for repeatability & token efficiency.

100% business logic preservation

100M+ lines of code auto-transformed to date

Trusted by Fortune 500 enterprises

Ranked #1 by McKnight Consulting Group
